

Employee Discount Program

We all need to place concrete from time to time and there is always a lot of questions regarding pricing. Depending on who you talk to you might very well get two different prices, so we are initiating an employee price discount policy that will apply to everyone.

We have a contractor's list price list that has 54 different mixes on it, one of these 54 mixes should apply to any project that are employees would take on. The new employee price is contractor's price less \$35.00.

This price is for concrete for your use only and is to be delivered to the residence in which you reside or non rental property that you own. These prices are not to be used for side work, relatives, or friends. Buckeye Ready Mix is selling these mixes as a benefit to you and your family. Concrete must be delivered during our regular business hours which are defined in our ordering guideline brochure. Ordering guideline brochures are available through Trish Correll, Sales Administrator at Taylor Road. These mixes are below cost and this program is a privilege, please do not abuse it. All concrete should be ordered though Customer Service at 1-800-CONCRETE. Any customer service representative will be able to price your material including extras, for example, calcium chloride, fibers etc. These extras are available at 50% of the cost listed on price list, with the exception of Saturday charges which will be waived altogether. If you have any questions on this special pricing program, please feel free to contact me at 614-575-2132 Extension 130.

Drivers – Do not haul your own concrete or expect additional discounts if you haul concrete off of the time clock; insurances reasons prevent us from doing this.

Regards,

Jeffrey W. Young
Vice President, Sales
